

WASTE AND SECONDARY RAW MATERIALS

- The **waste and secondary raw materials** sector is located in the eastern part of the Exhibition Center in 2018, and is therefore easily accessible from East entrance and North entrance. Specifically, it concerns halls A4–A6, B4–B6 and CS–C6.
- Waste management area, recycling and communal services require a direct connection to the outdoor space. Therefore, **waste treatment and recycling facilities**, as **well as facilities for decontamination of old loads and the utilization of secondary raw materials** are located in halls B4 to B6, halls A4 to A6 and, of course, adjacent open exhibition areas.
- The area of **waste management and secondary raw materials** is thematically supplemented by the field of energy utilization, biological processes and technologies against air pollution. These are located in hall A4. Equipment for **waste collection and its transportation** is located in hall AS, services concerning this field **will be presented in hall A6**.
- Communal technology **with its vehicles and extensions**, as **well as cleaning equipment, street cleaning and winter maintenance of roads** can be found in the **new halls ES and C6**.
